PROFESSIONAL EXPERIENCE

[CRAFT WORLD WIDE - BOSTON](#), Framingham, MA

July 2016 to April 2018

Senior Web Developer

During Craft's acquisition of Staples' internal creative agency, I continued to push the boundaries of technical innovation with a concentration on newer technologies as well as improving user experience and developing responsive and adaptive hand-written code.

- Invented an HTML5 interface for rapid-prototyping of HTML5 banners for both internal and external creative review meetings.
- Developed adaptive html modules (code snippets) to four separate breakpoints for consumption via the Staples.com Product database.
- Created mobile responsive landing pages that were visually appealing and user friendly while adhering to branding guidelines.
- Interfaced with clients, merchants and business stakeholders to ascertain their needs and conceptualize development solutions.
- Maintained source control using Git/Bitbucket.
- Collaborated with Oracle/Responsys to coordinate the collection of opt-in information via web forms on oracle servers.
- Conceptualized responsive emails for consumption via Salesforce and Responsys/Oracle systems.
- Coded emails responsive to work on desktop and mobile devices and over 40 email clients.
- Solved critical problems in a fast-paced environment to meet strict deadlines.
- Mentored and managed junior developers.

[STAPLES](#), Framingham, MA

December 2008 to July 2016

Web Developer**June 2010 to July 2016**

Developed HTML Micro-sites, Landing Pages, Web Banners and Emails for weekly and monthly online marketing and advertising campaigns on Staples.com, Staplesbusinessadvantage.com and Staples.ca.

- Brainstormed with designers to achieve the best possible user experience and constructed landing pages per client specifications.
- Ensured all web content was cross-browser compatible and W3C compliant.
- Constructed web pages using HTML5 document type.
- Generated CSS2 and CSS3 style sheets using SASS and Compass.
- Developed a JavaScript search scenario using regular expressions enhanced a jQuery menu system.
- Modified and created server-side includes.
- Maintained source control through SVN.
- Formulated daily B2B marketing email templates.
- Produced Object Oriented PHP scripts to produce multi-page web sites.
- Created jQuery tabbed interfaces and navigation menus.
- Composed working prototype websites for usability testing on existing programming code.

Interactive Web Developer**Dec 2008 to Dec 2009**

With Staples' acquisition of Corporate Express, a global communications vehicle was needed to acclimate 91,000 world-wide employees to help with change management communications, increased executive communications, updates on company's news and events and facilitate building a shared Staples culture globally, hence, my team and I were hired.

- Designed a secure forward-facing corporate intranet site (Staplescexp.com).
- Planned and configured the site for four world regions; United States, Europe, Canada English and Canada French.
- Integrated blogging technology for posting news articles, utilized commenting tools, and created weekly polls using the Mzinga Web 2.0 Platform and built-in development tools.
- Upon move to live production, transferred to Staples HRIS Portal Team to support ongoing site initiatives.
- Liaised with Staples' Internal Communications and HRIS and performed weekly content updates.
- Trained Associates on proper use of Mzinga Web 2.0 Content Management System.
- Spearheaded new site applications and developed requested enhancements for 508 compliance.
- Solved technical problems and provided support for registered members worldwide.
- Followed strict path-to-production protocols utilizing Excel, Borland Star Team and Remedy Change Request service.
- Wrote Best Practices and Guidelines documents for the sites.

WORPLACE PERSONNEL MANAGEMENT, Billerica, MA

Nov 2005 – May 2008

Marketing and Management Coordinator

Workplace Personnel Management is the corporate entity for 4 separate companies, Workplace Essentials, BirdMaster, WEfranchise and Bird Control Depot. Utilized multiple cross-transferrable skills that enabled me to perform in the following capacities: **Database Developer, Graphic Designer, Marketing Coordinator, Technical Writer, Web Designer and Web Developer.**

- Designed relational databases for use in the development of dynamically driven web sites utilizing Microsoft Access 2000, 2003 and DSN, ODBC, SQL query language, Visual Basic scripts and Windows IIS.
- Oversaw the print production process of external vendors to ensure design quality, integrity and accuracy.
- Coordinated and represented the companies at trade show events nationwide.
- Researched and produced advertising campaigns for both online and print media.
- Wrote 3-part specification sheets (White Papers) per Construction Specification Institute guidelines for all products.
- Created and wrote product installation manuals.
- Designed, developed and maintained (4) company websites.

- Wrote all web site content and designed graphics to include copy, banner ads and animation gifs.
- Designed all web sites utilizing W3C standards, XHTML compliance, cross-browser compatibility and excellent SEO practices.
- Integrated and maintained all company email servers across multiple domains.

ADDITIONAL RELEVANT EXPERIENCE

ROBOZONE - Owner/Operator

1995 – 2005

Designed, developed and maintained a business to consumer marketing and product web site to include an information database of products that directly targeted retailers and consumers over a broad range of toy interests and demographics.

- Experienced online sales in excess of 500K.
- Recognized by the Lowell Sun with a featured news article as a unique idea for a start-up company.

PERSONAL PROJECT

MASSACHUSETTS CICADAS – Founder/Owner

2010 - Present

Conceptualized, designed and developed an information web site containing content about Annual and Periodical Cicadas from the United States while focusing on the Cicadas of Massachusetts and New England. This site was launched in May of 2011 to coincide with the 2011 emergence of the Brood XIX Periodical Cicadas in the Southern region of the United States.
